Professional Experience

PHP Developer

Eureka Digitisation & Automation Services (eDAS)

Apr 2022 – present | Thane, India

- Designed and developed backend architecture for a new web application using PHP and Laravel framework.
- Built RESTful APIs to integrate with the front-end of the web application.
- Improved the performance of the application by optimizing SQL queries and caching.
- Collaborated with the front-end team to ensure seamless integration and user experience.
- Implemented security measures to protect the application from cyber-attacks.
- Created and maintained technical documentation for the project.

Projects

Face Emotion Detection System

Desktop Application

Jan 2022 – Mar 2022

- I have created a Desktop Application using machine learning and deep learning
- project in python-openCV
- Used tkinter for GUI .
- basically this application predicts human's Face expression in seven State such as happy, Sad,Angry,Disgust,Surprise,neutral

E-TRANSPORT

e-commerce website

Aug 2021 – Nov 2021

- I have created a e-commerce website named e-transport.
- in this website we can book trucks to transfer or supply good's and materials from one place to another with less effort .
- with just one click we can find a vehicle with e-transport .
- also we have all the records of our booking and trips and can easily accessible by user.
- e-transport is multiple user-side website i.e. User (Transporter : the one who provides vehicle) ,User(company's : who wants vehicle) , Admin .
