Top notch developer

WORK EXPERIENCE

2022 - Present

Software Engineer

Developers Studio

As a Full Stack Developer at Developers studio, I have worked on various interesting projects utilizing diverse technologies. My expertise includes using Laravel and ExpressJS for back-end development and MongoDB and Postgresql for databases. On the front end, I have experience working with VueJS. Through my journey at the company, I have enjoyed developing new solutions and continuously improving my skills.

In addition to my experience with these technologies, I have also taken the opportunity to learn and quickly master Python. I have used BeautifulSoup, Scrapy, and Selenium for web scraping and have successfully solved difficult scenarios such as bypassing captchas and scraping large amounts of data. I have also worked with Pandas, Numpy, and CentOS servers to perform complex calculations and process large amounts of data, up to 60 million records.

I am constantly looking for new opportunities to challenge myself and expand my skillset, and I am confident that my experience and abilities make me a valuable asset to the team at Developers studio.

2020 - 2022

Full Stack Developer

DevBunch Private Limited

As a Full Stack Developer at Devbunch, I have been involved in several projects that have been widely used by a large number of people. I have extensive experience working with Laravel, VueJS, and MySQL, and I have developed a project that integrates with various third-party services such as Stripe, Fortnox, Xero, Freespee, and Keyword.com. Additionally, I have taken the role of managing the server and have experience working with Debian servers. I have been responsible for code merging, deployment, and overall server management.

On top of that, I have also developed some cutting-edge WordPress themes and plugins that are live on ThemeForest, Codecanyon, and WordPress.com. These themes and plugins have received positive feedback and are actively used by many users.

I am a proactive developer and I am always looking for new opportunities to improve my skills and take on new challenges.

2019 - 2020

Laravel | Angular Developer

SolutionDots Systems

As a Full Stack Developer at Solutiondots Systems, I have been involved in several projects that have utilized a diverse range of technologies. My expertise includes using Codeigniter and Laravel for back-end development, Angular for front-end development, and MySQL for database management. I have experience in developing various enterprise applications such as ERP and POS systems and have developed a complete dining module in a POS system.

I have also experience in task management using Jira and code management using Github.

2019 - 2019

PHP Developer

WebiTech Corporation

As a Full Stack Developer at WebiTech Corporation, I have been involved in several projects that have utilized PHP and WordPress as the main technologies. My expertise includes using PHP for back-end development and WordPress as the content management system. I have experience in integrating various WordPress plugins and customizing existing WordPress themes to meet the client's needs. I have also used MySQL for database management.
