SUMMARY

My eagerness toward gaining knowledge about advancements and innovations in emerging technologies inspired me to choose computer sciences as a field of study and career. BS degree provided me the foundational knowledge. Being a software engineer and working on freelance projects helped me to gain hands-on experience in developing websites using different web technologies and CMS (i.e WordPress, etc). Positive attitudes, a pro-active approach towards personal development, analytical and problem-solving skills are my assets, which enabled me to achieve success and are my key resources to grow professionally.

SKILLS

WordPress		jQuery	
HTML		Javascript	
Bootstrap		C++	
CSS		Php	
WebFlow
