PROJECTS

Food Group (Store Management System)

It is a Food Service Distributor specializing serving Miami-Dade and Broward County. They work with many brands to ensure their customers receive a variety of flavors and quantities to meet the needs of each individual business.

We built a Store Management System for their daily in and out of products /items containing different detailed reports. The system fulfils the complete requirements of a store system.

My Role: I built this system from scratch and there was another developer as well who left it after few days. I was responsible for adding new features, maintaining the application and fixing bugs that may occur.

Technologies used: PHP, MySql, Laravel, JavaScript, git, datatables

CUI Platform

Is an internally used application by CUI. CUI manages their assets, clients, and users through it. It also provides a support team to run their daily routine jobs. It also handles billings and invoicing for the whole CUI.

My Role: I was the part of the team working on this project. We were total 4 persons working on it.

Technologies: PHP, Laravel, PostgreSQL, VueJS, API, Dropbox API, push notification APIs
