Problem Solving

→ Life Care Hospital

Life Care Hospital is a computer system that helps manage the information related to health care and health care providers effectively. They manage the data related to all departments of healthcare such as, Clinical. Financial. Managing service quality within a hospital requires an efficient approach for gathering feedback on the care provided. Healthcare providers should examine the perceptions of a variety of stakeholders including patients, physicians, nurses, and others to create a more comprehensive view of service quality.

→ Plantback

Plant back is an eCommerce project that helps manage the plant overall world. We work with a number of leading brands throughout the UK 964. We're proud to have received donations from our partnered shops and brands, because of you the user 60. We have planted lots of trees in the UK. You can also help us plant a tree by buying directly from us. Helping us make the world Carbon Emission-free. You can buy any product from our partner brands which helps us with plants for every sale they get through us.
