PROFILE INFO

I am a student, about to enter college. I create content for my own YouTube channel and its social media handles and have been doing so since 2019. I have been able to do so by self-learning the skill of video editing and graphic designing to facilitate the said work. My learning has been through a harsh trial and error method, hence improvisation is my key strength and sticking to commitments has made my clients return to me. I have won events for my school using my skills at different inter-school fests across my hometown.
