3. Strengths

I have 11 years + experience in PHP web technologies.

Senior PHP Developers build web and computer applications using the PHP programming language and may also be required to lead PHP development teams. Usual duties listed on a Senior PHP Developer resume include consulting with clients, making development project suggestions, assigning tasks, providing technical support, solving technical issues, testing software, and delivering work in time.

Worked with small scale company to globally leading IT companies started my career as an individual contributor and as I grew up in industry- I also got a chance to work with large team spread across the globe. I understand business requirement and how to turn it into reality. I have sound knowledge of backend-end technologies along with server side, cloud technologies
