Other Experiences:

- I am also having experience in Freelancing, please visit my freelancer profile. <https://www.freelancer.com/u/adil7090?w=f>

Cloud Resources Scalability for Multi Agents (Final Year Project): This was our Final Year Project (FYP) in which we improved the use of cloud resources for multi agent scalability. We used Amazon EC2 for cloud resources and Java (JADE) for programming. There are many techniques in Amazon EC2 that are used for scalability. Our aim was to provide such a flexible platform that can scale the cloud resources by making decisions to choose the best possible technique dynamically according to the changing scenarios and natures of different applications running simultaneously.

Matrix Calculator:

I developed a Matrix Calculator in C++ using Object Oriented Programming Concepts. It can perform any kind of operation used in Linear Algebra for matrices like Determinant, Adjoint, Transpose, Inverse, Multiplication, Addition, and Subtraction for the given matrices of with number of rows and columns.

Snake Game:

I developed a snake game in C++ on console only using cout, cin, getch and sleep functions. I used C++ vectors and push / pop.
