PROFILE OVERVIEW

Mphasis I Skyview Building 20, Hyderabad

- Project: Transact
- Client: CBRE
- Worked with Mphasis for 2.9 years as an Associate Software Engineer with a primary focus on Cloud Computing.

EXPERIENCE

- Involved in Deployment, deployed all the classes, triggers, objects, and components from sandbox to production environment.
- Used Data Loader to bulk import or export data from Salesforce.com objects, as well as to enter and edit data. Used for reading, extracting, and loading data from CSV files (comma-separated values).
- With the purpose of automating business logic, custom tabs, validation rules, approval processes, and auto-response rules were designed and implemented.
- Established relevant tasks, email notifications, and field updates while creating workflow rules.
- Pick list, lookup, master-detail relationship, validation, and formula fields have been added to the custom objects.
- Developed and set up Dashboards, Reports, and Report Folders for various user profiles in accordance with organisational requirements.
- Depending on user roles and groups, customised page layouts for opportunities, contacts, and accounts.
- Engaged in the creation of the corresponding project documentation and release information.

Project Management Intern

Emerging Technologies Wing,

Ministry of IT, Government of Telangana - BRKR Bhavan, Hyderabad

- Conducted Primary and Secondary research on the emerging technologies
- Developing a framework for Government policies for Telangana state in regards to the technology worked upon
- Designed a robotics framework for the state
- Developed a directory of prospective stakeholders for the relevant technologies.
