Summary

[EN]
I am a Full Stack Software Engineer currently working mainly in the Laravel MVC FrameWork, along PHP. I started my career as a PHP Backend Developer and then advanced to Laravel as a Backend framework. Along with PHP, I am confident with Html, JavaScript, and MySql and I have a pretty experience using Bootstrap as a frontend technology. Currently working on React as fronted developer and also has used Phython as programming language.
I have also experience with Version Control systems like "git" and working in teams for project development.
I love finding new problems to solve or trying to build better solutions to a known problem. In my free time, I enjoy reading about new technologies and open-source projects.

If you want to get in touch, find me at 'mushtaq.aslam7@gmail.com'
