=> Following the best practices for security, scalability, and maintainability.
=> Continuously learning and developing skills as a developer.

Web Developer
The Tech Teams
Jun 2020 - Apr 2021 (11 months)

#Tech-Stack && #Tech-Tools : Laravel, Vue JS, Vuetify , MySQL, Lumen, Postman, Slack, Git, Jira

#Key-Responsibilities :

-> Designing and developing new features and functionality for web applications using Laravel and Vue.js.
-> Writing clean, maintainable, and efficient code, following best practices and industry standards.
-> Collaborating with other team members, including designers, project managers, and other developers, to implement new features and functionality.
-> Participating in code reviews to ensure that all code is of high quality and meets the project's requirements.
-> Troubleshooting and debugging issues, as well as identifying and implementing improvements to the application.

-> Keeping up-to-date with the latest web development technologies and trends, and incorporating them into the application as appropriate.
-> Continuously testing and optimizing the application's performance to ensure it is running smoothly and efficiently.
-> Creating and maintaining technical documentation for the application.
Following the best practices for security, scalability, and maintainability.

#Key-Features

=> To Build a Centralized Web Portal from Scratch for a US Based Company in which we have multiple Challenges to meet consumer requirement and need.
=> System should be able to respond to a valid request even from a third-party application.
=> System should be able to deal with multiple user roles and permissions.
=> System should be able to adopt new major functionalities smoothly.
=> System should be efficient and secure and user-friendly.
=>System should have these features
-> Social Login,
-> Admin/Role's Portal with an attractive dashboard using charts and material UI
-> user Individual Login for Profile Setting,
-> Dashboard to perform multiple tasks. (As the Role can be changed/left/removed with the passage of time)
-> Email Verification
-> Daily Notifications,
-> Daily Tasks for the user through the Role Portal,
-> Dynamics Form using Vue. JS

Mobile Application Developer Internee
65work
Jun 2019 - Dec 2019 (7 months)
#Job Type : Internship part time along side my degree.

#Tech Stack:
Javascript, TypeScript, PHP, AngularJS, CSS , HTML, Node JS,Ionic3 Framework, Construct 2 Tool, MySql (workbench), Bootstrap, Git Repository

#Projects:
- Hotel Booking Mobile App
- Laundry App (Mama Wash)
- Online Tutor APP
-Online Food Oder App (Deli Food)

I am involved in build several prototypes of Hybrid Mobile Apps as per requirements.
And Focusing on these points
-> Building mobile apps using Ionic Framework and construct 2.
-> Collaborating with the development team to create new features and functionality for mobile apps.
-> Participating in code reviews to ensure that all code is of high quality and meets the project's requirements.
-> Troubleshooting and debugging issues, as well as identifying and implementing improvements to the application.

-> Keeping up-to-date with the latest mobile development technologies and trends, and incorporating them into the application as appropriate.
-> Participating in testing and quality assurance processes to ensure the application is functioning correctly on different devices.
-> Creating and maintaining technical documentation for the application.
-> Following the best practices for security, scalability, and maintainability.
-> Continuously learning and developing skills as a mobile developer and familiarizing with Ionic Framework.
-> Participating in meetings and discussions with senior developers and other team members to learn and understand the project requirements.
-> Working on my Final Year Project

Education

Bahauddin Zakariya University
Bachelor's degree, Computer Science
2015 - 2019

Licenses & Certifications

Digital Marketing - LMS DigiSkills
48KPFJQPQ

Freelancing - LMS Digi Skills
9DGY7C4PQ

E-Commerce Management - Ministry of Communication & Information Technology
MSUAVPPQ5

Skills

Vue.js • Laravel • JavaScript • PHP • MySQL • Git • Postman API • Vuetify • Vuex • jQuery
