Front-end & Backend Developer
Fiverr & Upwork
2018 to Continue

Reference
- Will Be Furnished On Demand

COVER LETTER

Dear Hiring Manager,

I am writing in response to your recent posting for the Backend developer position. Based on my academic experience, insatiable appetite for "number crunching," and dedication to excellent service, I believe that I am a strong contender for the position.

The following are some of my key skills and achievements:

- Developed and implemented a quality assurance standard operating procedure.
- Developed a regular testing and maintenance program for all production components.
- Knowledge of latest hardware trends and an ability to apply this knowledge to product development.

My mental flexibility is one of the characteristics that set me apart from other candidates. While I am capable of applying logic and reasoning to solve complex problems, I am also capable of using creative thinking during brainstorming sessions for innovation. If you believe I would make an excellent fit for your organization, please do not hesitate to contact me for an interview. I thank you in advance for your consideration.

Sincerely,

Maha

Maha Khan
